This report is not complete unless all pages, as noted below, are included. Please read the information in the 'Important Disclosures' found at the beginning of this report.

Investments are not FDIC - insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Important Disclosures

Figures shown are past results and are not predictive of results in future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. If a sales charge had been deducted, the results would have been lower. For more current information and month-end results, visit capitalgroup.com.

Investors should carefully consider investment objectives, risks, charges, and expenses. This and other important information is contained in the fund prospectuses, summary prospectuses, ABLEAmerica Program Description and CollegeAmerica Program Description, which can be obtained from a financial professional and should be read carefully before investing.

Regular investing does not ensure a profit or protect against loss. Investors should consider their willingness to keep investing when share prices are declining. Market indexes are unmanaged and, therefore, have no expenses. Investors cannot invest directly in an index. Results for the Lipper indexes do not reflect sales charges. Lipper indexes track the largest mutual funds (no more than 30), represented by one share class per fund, in the corresponding Lipper category. Lipper averages reflect the current composition of all eligible mutual funds (all share classes) within a given category. There have been periods when the fund has lagged the index.

This illustration must be preceded or accompanied by a summary prospectus or prospectus for the fund(s) being offered. American Funds Distributors, Inc., member FINRA.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses. Expense ratios are as of each fund's prospectus available at the time of publication. For American Funds Global Insight Fund and American Funds International Vantage Fund and American Funds 2065 Target Date Retirement Fund, the expense ratios are estimated.

Portfolio results reflect a combination of the mutual funds and/or ETFs shown, using the allocations and rebalancing frequency noted. The criteria and assumptions on which the portfolio is based are believed to be relevant to the likely financial situation and investment objectives of the intended investor. The portfolio's risks are directly related to the risks of the individual funds as described below. There are no guarantees that investment objectives will be met.

- The "Average annual return on the investment" is based on the initial investment and the breakpoint chosen.

If the results shown on the following pages do not reflect deduction of an initial sales charge (i.e. they are at net asset value), please note that they would have been lower if the sales charge had been deducted.

Investing outside the United States involves additional risks, such as currency fluctuations, periods of illiquidity and price volatility, as more fully described in the prospectus. These risks may be heightened in connection with investments in developing countries.

The return of principal for bond funds and for funds with significant underlying bond holdings is not guaranteed. Fund shares are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings.

Higher yielding, higher risk bonds can fluctuate in price more than investment-grade bonds, so investors should maintain a long-term perspective.
